

TEST REPORT of O-RAN Certificate and Badge

Certificate/Badge ID		Type of award	
		☐ O-RAN Conformance Certificate ☐ O-RAN IOT Badge ☐ O-RAN E2E Badge	
OTIC name			
Requesting entity(ies) names – list of all involved requesting entities			
Referenced O-RAN test specification			
Document name		Version	
Test report approval			
OTIC representative – full name, e-mail, phone		Requesting entity representative(s) – full name, e-mail, phone

1 Common test setup configuration parameters

The list of test setup configuration parameters and their values which are common for all tests and can affect the test results (e.g. carrier (central) frequency, sub-carrier spacing, total transmission bandwidth, duplex mode). The test specific parameters shall be listed at each related test.

① Please add any related parameters and their values

Test configuration parameter	Value

2 Information about DUTs/SUT

The test-related information such parameters, supported features about all Devices under test (DUTs)/System under test (SUT)

① Please add individual sub-section per DUT/SUT

2.1 DUT 1

DUT parameter	Value

3 Test equipment and tools

Utilized test and measurement equipment and tools.

ID	Equipment/tool	Vendor name	Model	SW/HW version	Notes
01					
02					
03					
04					

4 Test results

4.1 “add Test description as defined in test spec”

Test number – as defined in test specification	Test description – as defined in test specification
Tester/Contact person	Date
Status (Pass/Fail)	

List of utilized test and measurement equipment and tools, incl. the specific setting/configuration

① Please refer IDs of test and measurement equipment and tools from Chapter 3.

ID	Specific test-related setting/configuration	Notes

Test setup – connection/block diagram – deployment scenario – specific test configuration parameters

Test procedure – describe differences in comparison with the test procedures defined in test specification

Test results – measured KPIs – assessment of measured KPI (in comparison of the expected KPIs) – gap analysis

Notes, incl. observed issues with the pass to resolution steps

4.2 “add Test description as defined in test spec”

Test number – as defined in test specification	Test description – as defined in test specification
Tester/Contact person	Date
Status (Pass/Fail)	

List of utilized test and measurement equipment and tools, incl. the specific setting/configuration

① Please refer IDs of test and measurement equipment and tools from Chapter 4.

ID	Specific test-related setting/configuration	Notes

Test setup – connection/block diagram – deployment scenario – relevant configuration parameters

Test procedure – describe differences in comparison with the test procedures defined in test specification

Test results – measured KPIs – assessment of measured KPI (in comparison of the expected KPIs) – gap analysis

Notes, incl. observed issues with the pass to resolution steps
